

\$Raped Ape White Paper

Version 1.0 | July 21, 2025

1. Introduction

Welcome to the wild, wild West of cryptocurrency, where fortunes are made and lost in the blink of an eye. \$Raped Ape (\$Raped) is born from the ashes of this chaos—a meme coin for the Apes who aped into the market, only to be rekt by volatile shake-outs and ruthless rug pulls. Officially named Raped Ape, the \$Raped ticker stands for “Retard Aped” and “Retarded Ape,” honoring the bold, sometimes reckless Apes who’ve faced crypto’s untamed frontier. This is a symbol of resilience, a middle finger to the scammers, and a hedge against the unforgiving digital landscape. \$Raped Ape aims to be a safe haven for all fellow Apes, a community where the battered rise again, united under the motto “In Apes we trust.”

2. Purpose & Utility

In a world where 99% of meme coins fail, \$Raped Ape stands apart with a mission: to protect and empower those who’ve been rekt by the market’s brutality. This coin serves as:

- **A Hedge Against Chaos:** Designed to mitigate the impact of shake-outs and rug pulls, \$Raped Ape offers a potential staking mechanism where holders can earn rewards, creating a buffer against losses.
- **A Cultural Beacon:** Embracing the wild West narrative, \$Raped Ape mocks the volatility with humor and grit, using distressed crypto-looking ape silhouettes to reflect the theme of Apes rekt by this untamed crypto world. The \$Raped ticker, meaning Retard Aped and Retarded Ape, celebrates the daring spirit of these survivors.
- **A Safe Haven:** This is a sanctuary for all fellow Apes—whether you’re a seasoned trader or a newcomer scarred by scams. Together, we build a resilient horde, guided by “In Apes we trust.”

The utility extends beyond survival. Future plans include a community fund, seeded by a portion of platform fees (if applicable), to support audits and anti-rug initiatives, ensuring \$Raped remains a trustworthy ally.

3. Tokenomics

\$Raped Ape (\$Raped) is designed with a straightforward and fair launch model, reflecting a community-driven approach with limited initial investment. The structure is as follows:

- **Total Supply:** 1 billion \$Raped tokens (maximum cap).
- **Distribution:**
 - **100% - Public Sale (Bonding Curve Launch on Let’s Bonk, with the creator participating to kickstart).**

- **Transaction Fees:** Handled by the Let's Bonk platform post-launch; no creator-controlled fees are implemented.
- **Launch Strategy:** The creator will support the initial launch on Let's Bonk's bonding curve, ensuring early momentum without complex mechanisms, given limited investment. The 1 billion coin cap ensures scarcity as demand grows. Liquidity will depend on platform support and community participation. Migration to Raydium may be considered in the future, though the required market cap remains uncertain.

This setup prioritizes community access and simplicity, with the bonding curve allowing price growth based on demand.

4. Community & Vision

\$Raped Ape is more than a coin—it's a movement of Apes who've survived the crypto wilderness. Our vision is a decentralized community where:

- **Memes Rule:** Leverage the wild West theme with X campaigns, live streams, and distressed ape artwork to build a cult following, highlighting the Retard Aped and Retarded Ape spirit.
- **Engagement Drives Success:** Active participation on Telegram and Discord will foster trust, with regular AMAs to address concerns and share progress. If you "Aped" and lost, been rug pulled, shaken out, or are just a full-on Retard, this community is for you.
- **Partnerships Thrive:** Collaborate with ethical projects and influencers to amplify our safe haven message, united by "In Apes we trust."

This is a coin for the rekt, by the rekt. Every Ape who joins strengthens our fortress against shake-outs and rug pulls, turning scars into badges of honor.

5. Launch Plan

\$Raped Ape will launch on Let's Bonk, chosen for its vibrant ecosystem—over 22,000 tokens launched in 24 hours and \$539 million in daily volume as of July 2025. This platform's 55.30% market share and fee reinvestment into the BONK ecosystem offer a fertile ground to avoid the burial seen on Pump.fun. Our strategy includes:

- **Milestones:** Aim for early visibility on Let's Bonk, with potential migration to Raydium depending on community growth.
- **Marketing:** Sync with X hype, using bots during low-traffic hours, and launch memes to capture attention.
- **Transparency:** Publish smart contract details and audit plans pre-launch to build trust.

Post-launch, we'll monitor community feedback to refine **\$Raped's** role as a hedge, potentially integrating DeFi tools to bolster its safe haven status.

6. Risks & Disclosures

The crypto market remains a wild West, and \$Raped Ape is not immune to volatility. Risks include:

- **High competition from other meme coins.**
- **Potential regulatory scrutiny due to the provocative name and ticker.**
- **Reliance on community adoption for success.**

We commit to regular updates and audits, but investors should exercise due diligence.

\$Raped is not financial advice—ape at your own risk.

7. Conclusion

\$Raped Ape (\$Raped) is the coin for Apes who've been rekt, a hedge against shake-outs and rug pulls, and a safe haven for all fellow Apes. In this wild West crypto world, we rise together, turning losses into legends. Join the horde, stake your claim, and let's build a future where no Ape is left behind, trusting in "In Apes we trust."
